Group Name: Kwatro Pls

Group Leader: Angelo Miguel Orticio

Group Members:
Charles Gabriel Ang
Cyrus Katigbac
John Dave Umban
John Romaine Cagubcub

Name of the App: AcadEase

Screenshots of UI with explanations:

In Figure 1, we can see the login page of AcadEase, a class scheduling app in development by Kwatro Pls. Once the user has chosen between the sign up options, the logo will move up and a pop-up window will appear for the user to sign in.

Figure 1

Figure 2 shows the calendar page of the user. The user can also see some colored dots that represent a class located on the right side of the date. AcadEase has features that allows the user to see if they have a busy schedule (5 or more schedules) indicated by a red highlight. If the user clicks on that particular day in the app, they can also view their schedule list for that day. Another feature of AcadEase is that the user can press a specific time in their schedule to choose whether the user can attend or not in their course and if the user can't attend a specific class, the app will not notify on that time frame.
